Custom Capabilities ...... 7
BOSTONtec was founded on a commitment to providing ergonomic workstations that improve the quality of life and increase productivity. This is achieved through a full line of height adjustable workstations and a wide range of accessories that lift, tilt, rotate and slide for optimal flexibility.

**ANSI/HSF 100-1988**
BOSTONtec follows ANSI/HFS 100-1988 guidelines to ensure proper leg clearance and adjustability for seated operators. Our workstations are designed to support ADA compliance.

By utilizing a range of adjustable components, workstations can be configured to meet the needs of 90 percent of operators or what ergonomists refer to as the 5th to 95th percentile.

**PRODUCTIVITY**
While automation has improved quality and productivity, many of the tasks that remain are repetitive and can be detrimental to the human body. Proper workstation solutions allow users to focus strength and energy on the tasks at hand while avoiding harmful effects.

Properly designed workstations can increase productivity up to 25% over traditional fixed workstations by reducing unnecessary motion and subsequently increasing ROI.

**MSDs**
Musculoskeletal disorders (MSDs) are injuries and disorders of soft tissues such as muscles, tendons, ligaments, joints and the nervous system caused by repetitive motions. MSDs frequently involve the arms, wrists, hands and back.

MSDs account for 34% of all lost workday injuries and illnesses. Each year employers report nearly 600,000 MSDs requiring time away from work. BOSTONtec ergonomic workstations and accessories assist in preventing strain with convenient workstation height adjustability and by placing tools and other items within reach of the operator.

For more information go to www.bostontec.com/ergonomics

**ERGONOMIC SOURCES**

www.danmacleod.com
www.ergo-plus.com
www.ergonomics4schools.com
www.ergoweb.com
www.osha.com

Workforce diversity has made designing for the "average" worker obsolete. BOSTONtec workstations are designed for 5th to 95th percentile users.
Comfort and productivity can be significantly improved if the ergonomic reach of the operator is considered when designing a workstation. BOSTONtec has a wide variety of accessories to help place needed items according to the recommended zone.

### Horizontal Reach Zones

1st Zone
- High use items
- Least stress, most comfort
- Easiest access to items with minimal movement required

2nd Zone
- Medium use items
- Operator can comfortably reach by extending arm and rotating shoulder
- Requires little time to access items but extensive time in this position can cause fatigue and skeletal stress

3rd Zone
- Low use items
- Involves operator moving core body while in sitting position
- Substantial reduction in efficiency from first two zones

4th Zone
- Storage only
- Located outside of all three reach zones.

### Vertical Seated Reach Zones

1st Zone
- High use items
- Offers most operator comfort and fastest access to items

2nd Zone
- Medium use items
- Requires little time to access items but extensive time in this position can cause fatigue and skeletal stress

3rd Zone
- Low use items and storage
- Involves operator trunk movement representing significant efficiency reduction

BOSTONtec
BOSTONtec is the industry leader in customized solutions. Our in-house capabilities take your ideas from concept to final product.

Design and Engineering

Working with the customer, our sales and engineering team identify and address the specific needs of the application. Our engineering team then creates a customized solution with renderings to assist in completion of the final design.

Manufacturing

Once designs are customer-approved, our engineering and production teams turn the drawings into customized workstations. All aspects of manufacturing are performed in-house.

- Sheets of steel are laser cut, pressed and formed to exact specifications.
- Our welding department utilizes MIG, TIG and spot welding techniques.
- All steel components are finished on our powder coating line where they are high pressure washed, degreased, painted and baked at 400 degrees.
- Finally, workstations head to assembly where frame and under work surface components are assembled before shipment.

Shipping

BOSTONtec workstations are carefully packaged and palletized for protection during shipment.

Additional Services

BOSTONtec also offers project management services and onsite installation.

Build Your Own Workstation in 4 Simple Steps!

1. Select Workstation Base Frame
2. Select Work Surface Type
3. Select Feet or Casters Type
4. Select Accessories

Typical Fulfillment Workstation
- Corrugate Shelf Divider: CSSDIV
- Corrugate Storage Shelf: CSS1560
- Steel Panel Shelf Divider: DIV1215
- 12" Steel Shelf: SH1230
- Pneumatic Adjustable Monitor Arm: PFSMA
- 8-Outlet Power Bar: PBHM08
- Cantilevered Base Frame: PB3060
- Leveler Feet: FA30G
- Double Bay Uprights: DBUP53
- Bin Rail: BR0429 (Bins not included)
- Laminate Work Surface: 3M3060
- Stackable 6" Drawers: DRW36
- CPU Holder: CPU02

Typical Assembly Workstation
- Steel Peg Board: BS2428P
- Laminate Work Surface: 3M3060
- Cantilevered Base Frame: PBH3060
- Heavy-Duty Casters: FD30I
- General Purpose 2-Bulb Light: LTE4802_60
- Double Bay Uprights: DBUP53
- 15" Steel Shelf: SH1530
- Bin Rail: BR0429 (Bins not included)
- Stackable 6" Drawers: DRW36
Cantilevered Workstation

Best for multiple-operator, multiple-shift applications. Designed to support 5th to 95th percentile operators in a sitting or standing posture. Work surface height is easily adjustable at the touch of a button. A rear fixing frame provides stable support for single, double or triple bay uprights to hold bin rails, shelving, lighting and other accessories.

FEATURES:

- Cantilevered style leg ensures ample leg room
- Adjusts 28” to 44” without work surface
- Medium Duty (PB) includes self-contained linear actuator with integral limit switches, 24 VDC low voltage control
- Heavy Duty (PBH) includes dual-synchronized linear actuators with integral limit switches, 24 VDC low voltage control
- Supports **ADA compliance**
- Gray epoxy powder coat finish *(Additional colors available)*
- **Feet or casters, work surface and accessories** ordered separately

**Center-Justified Workstation**

Created for applications requiring access from both sides of the table. Best for multiple-operator and multiple-shift applications. Designed to support 5th to 95th percentile operators in either a sitting or standing posture. Work surface height is easily adjustable at the touch of a button. This frame does not support uprights.

**FEATURES:**
- Center-justified style leg
- Adjusts 28” to 44” without work surface
- Medium Duty (PBC) includes self-contained linear actuator with integral limit switches, 24 VDC low voltage control
- Heavy Duty (PBHC) includes dual-synchronized linear actuators with integral limit switches, 24 VDC low voltage control
- Supports ADA compliance
- Gray epoxy powder coat finish
  (Additional colors available)
- Feet or casters, work surface and accessories ordered separately

Note: 48” depth tables have widths available starting at 60”

*Additional sizes available upon request*
**Cantilevered Workstation**

Best for single-shift, single-operator applications where frequent height changes are not required. Designed to support 5th to 95th percentile operators in either a sitting or standing posture. Height adjustments are made by removing the locking hand screws, repositioning the telescoping legs to the desired height and replacing the locking hand screw. Rear fixing frame provides stable support for single, double or triple bay uprights to hold bin rails, shelving, lighting and other accessories.

**FEATURES:**
- Cantilevered style leg ensures ample leg room
- Medium Duty (AF) adjusts 28” to 40” without work surface
- Heavy Duty (AFH) adjusts 28” to 43” without work surface
- Supports [ADA compliance](#)
- Gray epoxy powder coat finish ([Additional colors available](#))
- Feet or casters, work surface and accessories ordered separately

Wire Harness Board Frame

This workstation is the result of three years of cooperative development with several major wire harness fabricators. The electric height adjustable and manual tilt mechanisms provide a more ergonomic work environment increasing productivity. Frame allows operator to properly set a large wire harness board quickly, then change position without removing work in process.

Frame may be raised or lowered at the touch of a button so operator can work comfortably sitting or standing.

Deck adjusts easily from horizontal to vertical position as well as multiple tilting options. Horizontal setting provides operator access to the board from all sides.

FEATURES:

- Space-saving compact footprint, 36” d x 72” w
- Deck is 36” d x 72” w, expands to 48” d x 72” w
- Supports boards up to 48” d x 96” w
- Multiple frames can work together to support extra long boards
- 36” of vertical adjustability with the board positioned in either the horizontal or vertical position
- 36” to 62” horizontal position height range
- Manual tilt 0° to 90° in 10-degree stops
- Self-contained linear actuator with integral limit switch, 24 VDC low voltage control
- Gray epoxy powder coat finish (Additional colors available)
- Casters and lag plates available

Leveler Feet
- Allow user to level workstation on uneven surfaces
- Leveler glides included

Drop Down Feet
- Unique drop down foot design
- Add casters without increasing starting height of the workstation
- Included with all casters

Lag Plates
- Compatible with leveler feet
- Plate has four 3/8” holes to bolt to floor (bolts not included)

Medium Duty ESD Casters
- Available with 2 locking and 2 non-locking casters or all 4 locking
- Polyolefin core with conductive rubber tread
- 5” overall height; 4” wheel

Medium Duty Standard Casters
- Available with 2 locking and 2 non-locking casters or all 4 locking
- Polyurethane material
- 5” overall height; 4” wheel

Medium Duty Leveling Casters
- Nylon non-marking wheel material
- 4” overall height on caster; 4 ½” overall height on leveler
- 2” wheel

Heavy Duty Standard Casters
- Available with 2 locking and 2 non-locking casters or all 4 locking
- Phenolic material
- 5” overall height; 4” wheel

Heavy Duty Leveling Casters
- Nylon -6 wheel; Buna-N leveling pad
- 4” overall height on caster; 4 ½” overall height on leveler
- 2” wheel

CONTACT US | 989-496-9510
**INDUSTRIAL WORK SURFACES**

**Premium Grade Plastic Laminate**
This highly durable work surface is constructed of 1 ¼ high density core board laminated with a ⅛” layer of plastic laminate.

**Standard Laminate**
Our most popular and economic work surface. All four sides are edged with a high impact-resistant 3mm thick PVC edging in a complementary color. Finished with a 2mm radius.

**T-Mold**
All four sides are edged with a resilient black molded bumper that resists damage. Rounded corners are formed with a 1 ¼” radius.

**Post Formed (Rolled Front)**
Our most ergonomic option for operators resting their wrists or arms on front edge. The front is formed in a 90-degree rolled edge for maximum user comfort. The back and two sides are straight 3mm edged. Also available in a 180-degree rolled edge.

**Cleanroom**
Same advantages as our post formed surface, but with additional ⅛” laminate on the under side and sealed edges for clean room environments. The back and two sides are straight, 3mm edged. Also available in a 180-degree rolled edge option. Class 100, 1000 and 10000.

**Electrostatic Discharge (EDS) Version**
All surfaces above are also available in an Electrostatic Discharge (ESD) version utilizing a special laminate that reduces electric current transfer on the work surface. Flush ESD grounding bolt is included and swivet connectors are available for grounding.

Additional Options

Stainless Steel

Durable and chemical-resistant, 1 1/2” stainless steel work surfaces are constructed of 14 gauge stainless steel formed over laminated core board. Work surface comes with a random brushed finish and is non-reflecting.

Maple

Ideal for areas that must stand repeated wear and tear. Beautifully fabricated with 1 3/4” edge laminated hardwood maple. This surface provides maximum strength and durability and looks good doing it. Also available in a 180-degree rolled edge.

Phenolic Resin

Solid phenolic is a high-pressure, thermoset resin composite. This chemical-resistant material is nonporous and nonconductive with high impact resistance and superior structure strength.

Didn’t see what you need? We’ve got you covered.

Contact your sales representative today for additional work surface options.

Pre Fix | Depth & Width

CONTACT US | 989-496-9510
Transfer & Rotation

Surface rollers and ball transfers are designed to simplify the moving of heavy loads.

Ball transfers are available in fixed or pneumatic retractable options. Each ball transfer is a self-contained unit capable of handling 10 to 30 pounds and allows the operator to move loads in multiple directions easily. When assembled in an appropriate pattern, they can support loads in excess of 1,000 pounds. Pneumatic ball transfers retract .065" below flange and may be controlled by either foot or hand switch.

A variety of surface roller and ball transfer patterns are available to accommodate differing tasks. Consult your sales representative for assistance in configuring the proper pattern for your application.
Tilting Work Surfaces

Tilt tables improve user ergonomics and productivity by better positioning a task, reducing operator reach and promoting proper posture. Available with a full or split surface tilt in drafting or rotational style. Choice of manual or electric adjustability. Available in laminate and hardwood work surfaces.

Drafting Style Tilt
Used for applications in which the work surface pivots from its front edge, similar to a drafting table.

Rotational Tilt
Used for applications where the surface tilts around an axis placed back from the front edge of the surface. Unlike a standard drafting table tilt, the front of the surface will drop as the back rises. This method helps users gain easier access inside large, deep items.

Manual Tilt
Manual tilt surfaces provide a simple, cost-effective method for adjusting position of smaller surfaces for light duty applications. The manual tilt option provides a ratcheting latch in the back of the work surface that allows the surface to be lifted to the desired tilt up to 30 degrees where the latch will lock into position.

Electric Tilt
Standard electric tilt up to 60 degrees is available on any style tilting work surface.

OFFICE & LIGHT DUTY

POPULAR WORK SURFACES

Premium Grade Plastic Laminate
This highly durable work surface is constructed of 1 1/4" high density core board laminated with a 1/4" layer of plastic laminate. All surfaces below are available in an Electrostatic Discharge (ESD) version utilizing a special laminate that reduces electric current transfer on the work surface. Flush ESD grounding bolt is included and swivel connectors are available for ground.

Standard Laminate
Our most popular and economic work surface. All four sides are edged with a high-impact-resistant 3mm thick PVC edging in a complementary color. Finished with a 2mm radius.

T-Mold
All four sides are edged with a resilient black molded bumper that resists damage. Rounded corners are formed with a 1 1/4” radius.

Post Formed (Rolled Front)
Our most ergonomic option for operators resting their wrists or arms on front edge. The front is formed in a 90-degree rolled edge for maximum user comfort. The back and two sides are straight 3mm edged. Also available in a 180-degree rolled edge.

Didn’t see what you need? We’ve got you covered.

All accessories have a gray epoxy powder coat finish unless noted otherwise. Additional colors available.

Look for the IO to verify compatibility with Industrial or Office/Light Duty workstations.
**ACCESSORIES**

**UPRIGHTS**

---

**Uprights**

- Uprights working in concert with proper accessories provide users with optimal ergonomic reach access and increased productivity.
- Double-slot, double-sided design allows users to place or move accessories in 1” increments without tools.
- Mount 33” or 42” above work surface with basic tools.
- 1” x 1” channel design provides area to fish wires or air tubes.
- Compatible with cantilevered workstation frames.
- Include hardware and mounting brackets.

---

**Single Slotted Upright**

**CAPACITY: 65 lbs.**

- For use with single-mounted accessories such as flat panel display arms and vertical power bar.

**Compatibility:**

Steel Shelf

**CAPACITY SH0830: 75 lbs.**
**CAPACITY SH1230 & SH1530: 100 lbs.**

- Allows for placement of items within the reach zones
- Place or move shelves on uprights without tools
- Shelf brackets allow for mounting flat or at a 15-degree angle and can extend shelf 2” away from upright
- Can be reversed to place lip on front or back of shelf
- Includes two mounting brackets
- Compatible with single, double and triple bay uprights; trolley and standing workstation frames
- Accepts steel shelf divider DIV1215 for additional organization

### Adjustable Shelf with Tilt

**CAPACITY:** 150 lbs.
- Tilting shelf reduces wrist strain when users repeatedly reach for objects
- Place or move shelf on uprights without tools
- Raised edges help hold items in place on incline
- Adjustable tilt, 0° to 250°
- Includes mounting brackets
- AS models compatible with single, double and triple bay uprights and standing workstation frames
- ATS models compatible with trolley frames
- Accepts adjustable shelf divider ASD18 or ASD24 for additional organization

**Compatibility:**

**Manual Height Adjustable Workstation Shelf System**
- Includes two side panels and one shelf
- Compatible with **AF** workstation models
- For **AFH** workstation models, decrease width by one size (Ex. For an AFH3672 workstation, order UWS1460)

**Electric Height Adjustable Shelf System**
- Includes two side panels, a safety back panel and one shelf
- Compatible with **PB** workstation models
- For **PBH** workstation models, decrease width by one size (Ex. For a PBH3672 workstation, order UWSBP1460)

**Additional Shelf (Optional)**
- Add an additional shelf to an under work surface shelving system
- Use in conjunction with corresponding part numbers above
- For **PBH** and **AFH** workstation models, decrease width by one size (Ex. For a PBH3672 workstation, order WS1460)
### Pneumatic Height Adjustable Flat Screen Monitor Arm
**CAPACITY: 20 lbs.**
- Provides optimum flexibility to move monitor into position
- Has tilt adjustability for improved viewing angle
- Holds monitor securely in place
- Height adjustability range = 11”
- Extension adjustability range = 22”

### Articulating Flat Screen Monitor Arm
**CAPACITY: 18 lbs.**
- Allows operator to swing monitor out of way when not in use
- Holds monitor securely in place
- Extension adjustability range = 18”

### Pneumatic Height Adjustable Keyboard Tray with Mouse Pad
**CAPACITY: 20 lbs.**
- Provides optimum flexibility to move keyboard into ergonomic position
- Keyboard platform rotates for easy adjustment
- Holds tray securely in place
- Tray includes 2” padded ergonomic wrist support strip for operator comfort
- Height adjustability range = 11”
- Extension adjustability range = 22”
- Keyboard tray is 10 ½” d x 19” w;
  Mouse pad is 8 ¾” diameter

### Articulating Keyboard Tray with Mouse Pad
**CAPACITY: 18 lbs.**
- Allows operator to swing keyboard tray out of way when not in use
- Keyboard platform rotates for easy adjustment
- Holds tray securely in place
- Tray includes 2” padded ergonomic wrist support strip for operator comfort
- Extension adjustability range = 18”
- Keyboard tray is 10 ½” d x 19” w;
  Mouse pad is 8 ¾” diameter
ARTICULATING COMBINED MONITOR AND KEYBOARD ARM

CAPACITY: 20 lbs.

- Allows operator to position both monitor and keyboard together then swing out of way when not in use
- Monitor has tilt adjustability for improved viewing angle
- Keyboard platform rotates for easy adjustment
- Tray size 9”d x 18 1/2” w
- 4” vertical adjustment
- Single arm allows 17” total extension from uprights (MKBAAS)
- Double arms allow 29” total extension from uprights (MKBAAD)

 UNDER WORK SURFACE KEYBOARD TRAY & MOUSE PAD

CAPACITY: 18 lbs.

Keyboard Tray
- Allows operator to access keyboard and mouse as needed then store under work surface when not in use
- Mounts under all laminate and hardwood work surfaces at least 30” deep
- 15-degree tilt
- 6” height adjustability
- Tray size 11”d x 21” w includes ergonomic support strip for operator comfort
- 18” track to allow in/out movement with 360 degree swivel

Mouse Pad
- Tilt and swivel
- 10” diameter
- Mouse pad includes ergonomic support strip for operator comfort

PULL-OUT KEYBOARD TRAY

CAPACITY: 40 lbs.

- Allows operator access to keyboard as needed then stores under work surface when not in use
- Mounts under all laminate and hardwood work surfaces at least 30” deep
- Tray size 18”d x 21” w
- ¾” extension roller slides allow tray to extend 13”
- 2.19” height clearance for keyboard
**CPU Holder**  
**CAPACITY: 50 lbs.**  
- Securely holds CPU off of floor  
- Wrap around design provides easy access when needed  
- Mounts under all laminate and hardwood work surfaces at least 30” deep  
- Adjusts to fit CPUs 4 3/4” w to 8 1/2” w by 15”h to 23”h  
- 16” sliding track with swivel  
- Color: Black

8-Outlet Horizontal Power Bar

- Keeps power within reach for easy end of day shut down of tools and lights
- Mounts on standard uprights at any convenient horizontal position, front or back
- Extruded aluminum housing
- 8 AC power outlets (115 VAC 15A)
- Circuit breaker and lighted switch
- UL and CSA listed and approved
- Length of power cord: 8 feet

Horizontal Power Bar Work Surface Mount

- Mounts power bar to work surface for easy access, no uprights required
- Mounts above or below work surface

6-Outlet Vertical Power Bar

- Keeps power within reach for easy end of day shut down of tools and lights
- Mounts on standard uprights at any convenient vertical position
- Extruded aluminum housing
- 6 AC power outlets (115 VAC 15A)
- Circuit breaker and lighted switch
- UL and CSA listed and approved
- Length of power cord: 15 feet

6-Outlet Horizontal Power Bar

- Mounts to underside of work surface for easy end of day shut down of tools and lights
- Extruded aluminum housing
- 6 AC power outlets (115 VAC 15A)
- Circuit breaker and lighted switch
- UL and CSA listed and approved
- Length of power cord: 15 feet

**General Purpose 2- and 4-Bulb Light**
- Provides additional lighting directly over work surface
- Electronic ballast
- Optional parabolic filter diffuses light evenly over the work surface (shown in inset)
- Includes "L" bracket for mounting light and tool track
- Support extends up to 18" from uprights
- Accepts 32-watt T8 bulbs (not included)
- Switch enables 2- or 4-bulb operation
- 2-bulb is available in 36" long and 48" long housing
- 4-bulb is available in 48" long housing
- Pair with power bar PBHM08 for convenient on/off feature

LABORATORY

Build Your Own Workstation in 4 Simple Steps!

1. Select Workstation Base Frame
2. Select Feet or Casters Type
3. Select Work Surface Type
4. Select Accessories

Typical Laboratory Workstation

LED Task Light: TL11XXXX17

Power Manifold: PM01URS1G06015

Electric Height Adjustable Workstation: LPC3060

Heavy Duty Leveling Casters: FB30N

Premium Grade Laminate Shelf: SU011260LDAS

Pneumatic Adjustable Monitor Arm: PFSMAS

Steel Slotted Uprights: URS13660

Under Work Surface Keyboard Tray and Mouse Pad: UWKTM

BOSTONtec
Electric Height Adjustable Laboratory Workstation

This workstation is ideal for multiple users and maximum configurability in a fast paced lab environment. Work surface height is easily adjustable at the touch of a button.

Manual Height Adjustable Laboratory Workstation

This frame is best for single-shift, single-operator applications where frequent height changes are not required. Height adjustments are made by removing the locking hand screw, repositioning the telescoping leg to the desired height and replacing the locking hand screw.

**FEATURES:**

- Cantilevered style leg ensures ample leg room
- Designed to support 5th to 95th percentile operators in a sitting or standing posture
- Adjusts 28” to 44” without work surface
- Electric style has dual-synchronized linear actuators with integral limit switches, 24 VDC low voltage control
- Supports ADA compliance
- White epoxy powder coat finish
- Work surface and accessories ordered separately; not compatible with Industrial and Office accessories.

FEET AND CASTERS

**Leveler Feet**
- Allow user to level workstation on uneven surfaces
- Leveler glides included
- Shown above on LMC model

**Heavy Duty Standard Casters**
- Available with locking and non-locking casters
- Phenolic wheel material
- 4” wheel; 5” overall height
- Shown above on LPC model

**Heavy Duty Leveling Casters**
- Nylon 6 wheel; Buna-N leveling pad
- 2 1/2” wheel; 4 1/2” overall height

See chart for foot and caster ordering information.

Premium Grade Plastic Laminate
This highly durable work surface is constructed of 1 ¼ high density core board laminated with a ¼” layer of plastic laminate.

Standard Laminate
Our most popular and economic work surface. All four sides are edged with a high-impact-resistant 3mm thick PVC edging in a complementary color. Finished with a 2mm radius.

Stainless Steel
Durable and chemical-resistant, 1 ½” stainless steel work surfaces are constructed of 14 gauge stainless steel formed over laminated core board. Work surface comes with a random brushed finish and is non reflecting.

Phenolic Resin
Solid phenolic is a high-pressure, thermoset resin composite, chemical-resistant material. It is nonporous and nonconductive with high impact resistance and superior structure strength.

Epoxy
A monolithic thermostetting material composed of modified epoxy resin and a fine filler material. This material exhibits exceptional structural strength and excellent chemical resistance. Finished edges are the same material as the work surface. Thickness is 1”.

For additional work surface options, please refer to the industrial work surfaces pages | Standard Color: Black; additional colors available.
Surface-Mount, Steel Slotted Uprights
Upright Capacity for 36”w & 48”w Workstations: 150lbs.
Upright Capacity for 60”w & 72”w Workstations: 225lbs.
- Allow convenient access to accessories with optimal ergonomic reach access increasing productivity
- Slotting pattern allows adjustment in 1” increments without tools
- Accept laboratory accessories only
- Include hardware and mounting brackets
- White epoxy powder coat finish (Additional colors available)

Premium Grade Laminate Shelf
30” Shelf Capacity: 100 lbs.
36” Shelf Capacity: 120 lbs.
48” Shelf Capacity: 160 lbs.
- Provides additional storage space within operator reach to keep work surface space available
- Includes a structural rear retainer lip
- Includes two angled brackets with white epoxy powder coat finish (Additional colors available)
- Standard black laminate; additional colors available

Under Work Surface Keyboard Tray & Mouse Pad
Keyboard Tray
• Allows operator to access keyboard and mouse as needed then store under work surface when not in use
• Tray size 11” d x 21” w includes ergonomic support strip for operator comfort
• 18” track to allow in/out movement with 360-degree swivel
• 15-degree tilt
• 6” height adjustability
• Mounts under all laboratory work surfaces at least 30” deep

Mouse Pad
• 10” diameter
• Includes ergonomic support strip for operator comfort

Not compatible with laboratory carts
LABORATORY ACCESSORIES

Power Manifold
- Allows convenient access to electricity and/or data usage
- Data ports are non-wired
- 20A rated manifold
- Cord Length: 15 feet
- White epoxy powder coat finish (Additional colors available)

Four Duplex Outlets
