

# LATITUDE *By Case Systems*

## *Gain More. Teaching & Exploring Together.*

NEW!

Introducing **LATITUDE** – functionality and ease combined. Experience the convenience of a typical lab workstation and the ease of a height adjustable desk all-in-one. If you are tired of shuffling around resources (and students,) from lecture spaces to work zones, this is your solution.

### Table Highlights:

- ① Supporting the modern science curriculum; switch effortlessly from lecturing to lab with fixed or electric height adjustable options. Go from 30" to 36" in seconds, saving valuable time and keeping order in the classroom.
- ② Save time and optimize flow by offering sinks at each student table. (Configurations without sink also available.)
- ③ The Latitude table offers integrated services like gas, water & power; making experiments safe, and connections convenient.
- ④ Industry standard work surfaces offered in epoxy or phenolic resin options. (Alternate surfaces available upon request.)
- ⑤ Create inspiring and robust environments that support and withstand student curiosity. Match new or preexisting designs, by choosing metal or plastic laminate base pedestal enclosure panels – available in a variety of colors and patterns.
- ⑥ Fulfill your ADA sink requirements in your classroom by adding a sink to your configuration. (Sink arrangement is ADA compliant with a height of 34 inches.)
- ⑦ Comfortably seat groups of 4 students in a collaborative learning environment.

Contact your Case Systems representative today to learn more about the new **LATITUDE** lab table! Visit [CaseSystems.com](https://www.CaseSystems.com) to find your Case Systems dealer.
